The Fire Safety Consultants

YOU CAN TRUST!

Get to know HR Fire & Safety LTD

Established since 1976, we are a family owned and run business. With a focus on expertise and providing only the highest level of customer service, all HR Fire & Safety Ltd engineers are fully trained to BS 5306. They also complete three-year refresher courses, as required by British Standards, ensuring that they are always up-to-date with any changes.

HR Fire & Safety Ltd is an independent fire safety consultancy. We have just one goal, to provide you with personal advice on fire safety equipment, fire procedures, in fact all things fire safety related. Using a tailored approach, we help you to decide on fire safety services and products which are the best fit for your individual needs.

Good old-fashioned customer service, from a company who cares

With extensive experience and a reputation for providing a quality service, put your fire safety requirements into our safe hands.

Sounds simple? Well, the best things in life often are.

Fire Protection

Fire safety is about more than a quality fire extinguisher. In addition to fighting the fire itself, you are reliant on a suitable system which will alert you to the presence of fire. You also need a fire safety system which directs anybody who is inside the building to where they need to go.

HR Fire & Safety Ltd supplies, installs and services a range of fire safety equipment which is fully compliant with the latest standards and legislation. We provide full on-site demonstrations, for each piece of equipment installed, ensuring that you have the necessary knowledge and experience to use it, should the situation arise.

To assess your existing fire protection system, or discuss future requirements, please call us.

Expert advice – As experts in the field of fire safety, you can be certain that every piece of fire equipment we provide is of the highest quality.

24 hour callouts – We know that fire alarms require round-the-clock support, so both day and night you can rely on our engineers to support you for any emergency repairs or maintenance work.

Complete service – Our team has the experience required to provide you with a high-quality service for every aspect of fire safety.

Compliance – Fire protection is about safety, but it is also a legal requirement. You could face large fines, or further legal action if you fail to provide adequate fire protection equipment and training in your commercial property.

Fire Extinguishers

Fire never gives you a second chance, so it is vital to get it right first time, when choosing your fire extinguisher. The damage and devastation caused by fire could cost you money, your business or even your life. It really is not worth the risk, so why take it?

HR Fire & Safety Ltd provides all the advice and information you need, to ensure that you have the right fire extinguisher for your requirements. Giving you complete peace of mind that your property is suitably protected. We supply and install Firepower and Gloria extinguishers which are known for their reliability and quality.

All new extinguishers have a 12-month manufacturer's warranty provided they are serviced by us in accordance with BS 5306.

Our range of fire extinguishers

Water
Extinguishers

Foam
Extinguishers

Powder
Extinguishers

Chemical

What kind of fire extinguisher do you need?

	Class of Fire					
	Type A: Paper, wood, textiles	Type B: Flammable liquids	Type C: Flammable gases	Type F: Cooking oils/fats	Electrical hazards	Vehicle protection
Water	✓	✗	✗	✗	✗	✗
Foam	✓	✓	✗	✗	✗	✓
Powder	✓	✓	✓	✗	✓	✓
CO2	✗	✓	✗	✗	✓	✗
Wet Chemical	✓	✗	✗	✓	✗	✗

Health & Safety – Are you an employer, landlord or owner of non-domestic premises in England or Wales? Then you are responsible for fire safety in that property and face legal action or fines if you fail to have the necessary fire protection equipment.

Lower cost – All of the fire extinguishers which we supply are stored-pressure models, which means that they remain under pressure until they are used.

Simple to use – Finding a fire extinguisher easy to use in the event of fire is very important, and our extinguishers have been designed with exactly that in mind.

On-site maintenance – Please remember that fire safety in your workplace or commercial property is a legal requirement. Contact us if you have any concerns about your fire safety plans and responsibilities.

Fire Risk Assessment

Fire safety is a big responsibility and something that you cannot avoid. A professional fire risk assessment enables you to identify potential fire hazards and receive sound advice on how best to tackle these. Our fire risk assessments meet the requirements of the Regulatory Reform Fire Safety Order 2005.

Your safety is a priority and our fully trained team will carry out a thorough inspection of your premises and provide you with a detailed written report of recommendations.

Let us help you to take the pressure off. Talk to us about how you can stay ahead of potential fire hazards.

Ensure that your fire safety scheme meets the appropriate standards.

3 simple steps to improved fire safety

Step 1 – Our experts carry out your fire risk assessment at a time that suits you.

Step 2 – You receive a full written report on any fire risks and how to deal with them.

Step 3 – Update your current fire safety equipment with our quality range of products.

Fire Safety Training

Would you and your employees know exactly what to do in the event of a fire?

We can provide you with all the high-quality fire protection equipment you need to achieve Health & Safety compliance. However, it is important that everybody knows how to use it.

At HR Fire & Safety Ltd, we offer fire safety training so that everybody is ready and prepared for a fire emergency. From demonstrations on how to use fire extinguishers, through to advice on evacuation procedures, you can trust us to give you all the information and assistance needed.

It is a legal requirement to provide fire safety training to all staff with regular refresher courses.

Essentials lessons you will learn

An introduction to fire awareness – How do fires start in the first place? What are the most common causes? Your questions answered.

Fire safety in your building – Identify fire exits, alarm call points and other important safety features situated in your building.

Fire extinguisher demonstrations – Learn which type of fire extinguishers are needed for different classes of fire and how to use them safely.

Your fire protection plan – Create your own plan of action, including contacting emergency services and evacuating the building.

Looking for ways to improve your current fire prevention procedures at work? Need repairs carried out on your fire safety equipment? Or are you simply after honest advice from someone who knows exactly what they're talking about? You'll find it all here at HR Fire & Safety Ltd.
